**You can also share the link and details with the students through the college internal whatsapp or facebook group and ask them to register for this event.**

**Please Ignore If you have already registered and shared the students database with us.**

## -GS LAB HIRING SOFTWARE ENGINEER 2017 BATCH-

— My Anatomy —

My Anatomy is associated with "GS LAB" for their entry level software Engineering and has been given the responsibility of coordinating the event for pre recruitment, recruitment support process

It gives us immense Pleasure to invite you for the pooled Campus drive as per the details mentioned below.

### Company Profile:

GS Lab started in 2003, but the story began a long long time ago. Before GS Lab, all

its execs were in risky businesses. Shridhar Shukla - an early OPD proponent, Sunil Gaitonde - a serial entrepreneur in the US, Atul Narkhede - into product start-ups, Ajit Bhale - staying calm in critical customer situations, and Ajit Patwardhan flying MIGs!

Planets align, stars sparkle and Sunil Gaitonde and Shridhar Shukla get some space, the company is formed - August 27, 2003!

We were thinking big, wanted to build great software products, and achieve "growth through incubation". And the Great Software Laboratory was born.

Over the years, we worked as development partners for a number of product companies, many of them leaders in their space, as well as startups. We evolved to become their engineering and development partners, so that we now contribute to their product and innovation roadmaps. We decided to invest in technology assets that would give our customers an edge, which is what keeps our lab busy.
