ENERGY CLUB

EVENT REPORT • 2026

Representation at EXORDIUM

Parala Maharaja Engineering College (PMEC), Brahmapur

EVENT	REPRESENTING	YEAR
EXORDIUM	Energy Club, PMEC	2026

1. Introduction

In 2026, the Energy Club of Parala Maharaja Engineering College (PMEC), Brahmapur, was represented at **EXORDIUM**. The participation provided a platform for the club to present an energy-related learning activity and to engage with the academic and technical environment of the programme.

2. Club Representation and Presentation

The photographs document Energy Club members addressing the audience with a microphone and explaining presentation material. The visible presentation screen includes stages of the electrical energy chain, particularly **transmission** and **distribution**. This reflects the club's effort to communicate engineering concepts in an accessible, presentation-based format.

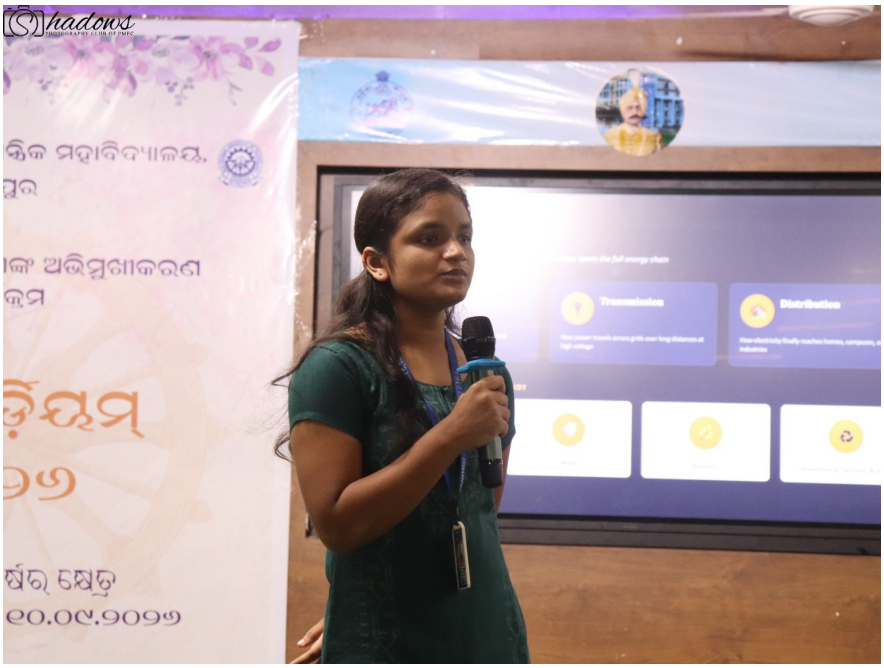

The representation also highlighted the importance of student participation in technical and institutional programmes. Speaking before an audience offers students an opportunity to organise technical information, explain ideas clearly, and build confidence in professional communication.

3. Learning and Significance

Participation in EXORDIUM supported the broader aims of the Energy Club: encouraging technical curiosity, sharing knowledge related to electrical energy, and developing presentation and teamwork skills. It also helped bring visibility to the club's activities within the college community.

The experience serves as a useful step in motivating members to take part in future technical events, prepare well-structured presentations, and connect classroom concepts with real-world energy systems.

4. Photographic Documentation

Energy Club representation during the EXORDIUM programme.

A club representative explaining the presentation to the audience.

5. Conclusion

The Energy Club's representation at EXORDIUM 2026 was a meaningful opportunity to share energy-related knowledge and demonstrate student involvement in the college's technical activities. The photographs provide a record of the club's participation and the presentation delivered during the programme.
